

AAJI NURSERY

Website Structure & Content Blueprint

Prepared to ensure customers find answers without repeated inquiries

1. Home Page

First impression for every visitor

- Business name: Aaji Nursery
- Short introduction to the business
- Tagline that reflects the brand

2. About Us

Builds trust and credibility

- What the business does
- Years of experience
- Team details

3. Services

Clarifies exactly what is offered

- Service 1 with price
- Service 2 with price
- Service 3 with price
- Key features of each service

4. Pricing Section

Removes pricing-related queries

- Fixed pricing table
- Monthly / yearly plans (if applicable)
- Discounts or offers (if any)

5. FAQs

The most important section — answers repetitive questions

- What are the prices?
- How many days for delivery?
- What payment methods are accepted?
- How can customers reach support?
- What is the refund policy?
- What are the working hours?

6. Contact Us

Makes reaching out effortless

- Phone number
- Email address
- WhatsApp button
- Business address
- Embedded Google Map

7. Testimonials

Social proof from real customers

- Reviews from existing customers

8. Portfolio / Gallery

Visual proof of quality

- Previous work
- Screenshots
- Images of plants and projects

9. Blog / Updates

Keeps the audience engaged

- New offers
- Latest announcements

10. Inquiry Form

Captures leads directly

- Name
- Mobile number
- Requirement
- Submit button

Quick Reference Guide

Customer Question	Where It's Answered
What is the price?	Pricing Section
How do I contact you?	Contact Us
What services do you offer?	Services Page
How long will it take?	FAQs
Are there any reviews?	Testimonials
Where is your office?	Google Maps

Optional: Admin Dashboard

For service-based offerings such as consultations or maintenance plans, an Admin Dashboard can be added — allowing prices and information to be updated without any coding knowledge.

This structure ensures that **80–90% of customer questions are answered directly on the website**, significantly reducing repetitive queries and enabling faster, more professional customer engagement.
